A Description of the Foure Quarters
of the Yeere, and first of
Winter.

☉ in ♍, ♎, ♏.

A According to the custome of Writers in
this kind, Winter Quarter is the first
Quarter, which take beginning the 12. day of
December, 1636. at what time the Sunne en-
tered into the first degree of the cold and dry sign
Capricorne, being the most remote from us
in his farthest South inclination, causing the
dayes with us to bee shortest and the nights
longest: which Quarter continuing untill the
Sunne hath slowly passed through Capricorne,
Aquarius, and Pisces. This Quarter doth na-
turally resemble old age.

Of the Spring.

☉ in ♈, ♉, ♊.

This Quarter doth take beginning the 10.
of March, at what time the Sun entresth
into the first min. of Aries, and doth continue
whilst the Sunne is passing through these 3.
vernall signes Aries, Taurus, & Gemini, This
Quarter doth resemble growing youth.

Of

Perkins. 1637.

Of Summer.

☉ in ♋, ♌, ♍.

The Summer Quarter doth take his beginning when the Sunne doth enter into the first degree of Cancer, which will bee this yeere the 12. of June, and doth continue whilst the Sunne passeth thorow Cancer, Leo, Virgo, now are the dayes longest, and the ayre hottest, therefore, but for necessity, bid Physicke Adieu.

Of Autumne.

☉ in ♎, ♏, ♐.

Autumne or Harbest Quarter (commonly called the Fall of the leafe, of some the Latter Spring) doth begin when the Sunne doth enter into the first degree of Libra, making againe the day and the night of equall length: which will be this yeere the 13 of September, and doth continue whilst the Sunne doth passe through Libra, Scorpio, and Sagittarius. This Quarter doth fitly resemble declining age and Phlegmaticke complexion.
